

# Device Status

Blues Notehub Guide

# Step 1: Projects Page

Projects (14)

- Sign into the Blues Notehub and go to <https://notehub.io/projects>
- Double click on one of the projects to open it

# Step 2: Devices Menu

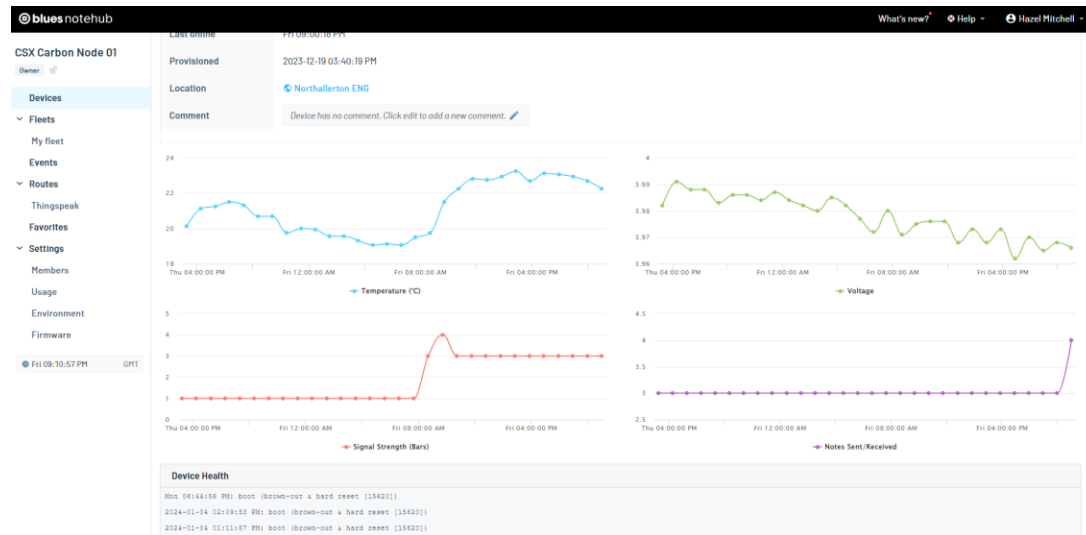

- In the “Devices” menu, tick the checkbox for the device, then click the “View” button near the top right of the page.

The screenshot shows the Blues NoteHub interface. On the left is a sidebar with a navigation menu including 'Fleets', 'Events', 'Routes', 'Thingspeak', 'Favorites', 'Settings', 'Members', 'Usage', 'Environment', and 'Firmware'. The 'Devices' menu item is highlighted. The main content area is titled 'Devices' and contains a search bar, tabs for 'Recent', 'Notecard Firmware', 'Host Firmware', and 'Usage', and a table of device data. A single device is listed and selected.

Status	Last seen	Best ID	Best Location	Tags	Fleets
<input checked="" type="checkbox"/>	Fri 09:00:18 PM	dev:867848043590130	Northallerton ENG		My fleet

- (Alternatively, double-click the device row)

# Step 3: Device Status

- The device status should now be visible. Scroll down to see graphs of temperature, voltage, signal strength and message counts.
- Signal strength ranges from 0 to 4 bars, with 4 being the highest signal strength
